EXPERIENCE

> Full Stack Dev + AI - RealAML (June 2024 - Present)

Working as a remote Full Stack + AI developer at my current role, at a fast paced growing Startup, I've been involved in several impactful projects. I had led projects including integrating Zapier with our SaaS directly, to give access to automating workflows, along with that I have integrated Annature directly as well to enable esigning functionality and Another wing I have spearheaded include the AI Wing at the company. I have extensive experience working with backend services using Python, Django, and Django Rest Framework (DRF), and on the frontend, I've been working with TypeScript and React to build responsive and efficient user interfaces

Working with AWS, Docker, for Deployment

> Data Science Engineer - (December 2023 - June 2024)

Working at **ECHO** as a **Data Science Engineer** intern, working with python automation, Jenkins pipelining, selenium, data analytics and machine learning models. December 2023 to present.

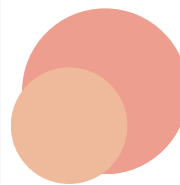

> Summer Intern - Data Science (May 2023 - June 2023)

Worked at **Nandi Toyota** as a **Data Science** intern, built a fully functioning web scraper with a clean UI using Selenium, Python and Flask to assist in data extraction for analysis in their ongoing project. Hands on experience with RFM, ABC and other analysis on a dataset using various ML models.

May 2023 to June 2023

> Summer Intern - Web Dev (May 2022 - July 2022)

Worked in **Vehpal FZ LLC** as a **Web Developer** intern, on the front end of the currently running website to assist in its development during the month of May 2022 to July 2022

PROFILE INFO

I'm a Full Stack Developer working with AI at RealAML, New Zealand and currently a student pursuing a Master in Artificial Intelligence and Machine Learning from Jönköping University.

I am passionate about technology and Skilled in Multiple Disciplines ranging from Data Science and AI to Data Engineering and Full stack Development..

Proficient in Python programming, SQL, Automation, Machine Learning. Familiar with Pipelines, Data Science and skilled in design. Interested in UI & UX and Cyber Security. Currently working remote as a Full Stack Developer + AI at RealAML, New Zealand

PROFESSIONAL SKILLS

- Python Language - Flask, Django(DRF)
- AIML
- Data Science
- Selenium
- Automation
- Data Engineering and Pipelines - Jenkins
- Front-end - React
- Docker, AWS
- C Programming, Java
- Figma, UI/UX, Adobe Photoshop
- SQL Databases, SSMS
- Machine Learning models & Business Analytics (Business Intelligence)
- Source Control Tools
- PHP (Laravel) and PSQ

EDUCATION HISTORY

Jönköping University 2024- 2026 - Ongoing Semester 1
Masters in AI Engineering

Christ University 2020- 2024 - CGPA 8.85
BTech CSE (Honors in AIML)

CERTIFICATION COURSES

2023 - **Data Science** Virtual experience
Programme - **British Airways**

2023 - The Joy of Computing using **Python**
course - **NPTEL**

2023 - **Cloud Computing course - NPTEL**

2022 - Introduction to Philosophy course -
The University of Edinburgh

2022 - PCAP: Programming Essentials in Python
course -
**Python Institute and CISCO Networking
Academy**

2021 - Introduction to Psychology course -
Yale University

2021 - Nature-based Solutions for Disaster
and Climate Resilience course -
**United Nations Environment
Program (UNEP)**

2020 - Project Management: The basics for
Success course -
University of California, Irvine

2020 - Design Thinking for Innovation course
- **University of Virginia, Darden
School of Business**

PROJECTS

- > Built a full stack PDF Chat application with react and Django - Answers chat questions based on the context provided.
github.com/Enwin-A/pdf-chat-application
- > Built an Audio Processing tool to process MP3 files and process it and return sentiment analysis, psychological analysis, and Behavioral Analysis.
<https://github.com/Enwin-A/Audio-App>
- > Worked in a team to perform **URL classification** by developing an **LSTM neural network**. -
<https://github.com/Enwin-A/LSTM>
- > Built well functioning robust product matcher , and web scraper as a personal project.
github.com/Enwin-A/Product-Matcher1
github.com/Enwin-A/Web-Scraper1
- > Built a full stack CRUD Application for fun as a personal challenge in under 24 hours
<https://github.com/Enwin-A/Basic-Blog>
- > Made multiple **Responsive Websites** and turned one into a mobile application
<https://github.com/Enwin-A/ZenGarden>
<https://enwin-a.github.io/personal-site1/>
- > Worked in a team and made a full-scale **Complaint Management System** with working backend using PHP, MySQL, & XAMP.

ACHIEVEMENTS / AWARDS

- FOOBAR 7.0 -CSS Battle – 2nd place - 7th semester (Bachelors)
- Got 97% in 6th semester (Bachelors) in Global elective- Sketching & Painting
- Was ranked 1 in high school (10th Grade) in Sketching & Painting

EXTRA CURRICULAR ACTIVITIES

- Part of the Swim Team in High School.
- I play the Guitar and the Drums, and Sketch.
- I play Basketball, football recreationally.
